### **DETAILED ACTION**

This is an Allowance for Application No. 10/712,428 in response to the After Final Amendment filed on May 6, 2008.

#### ***Allowable Subject Matter***

Claims 4, 17, 27 and 34 are allowed.

The following is an examiner's statement of reasons for allowance: After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 4, 17, 27 and 34 are found to be in condition for allowance.

The claims are allowable over the prior art of record since the cited references taken individually or in combination fail to particularly disclose a method, apparatus, and computer-readable medium as claimed.

The closest prior art (US Patent 5,608,538 to Edgar) discloses a similar method, apparatus and computer-readable medium for accepting line-scan data sets at a camera rate from a line-scan camera and resampling the line-scan data sets to produce resampled line image data sets at a desired sampling distance. However, Edgar fails to teach all the limitations of claims 4, 17, 27 and 34. As originally indicated in the Office Action mailed September 11, 2007, Edgar fails to teach:

wherein each accepted line-scan data set corresponds to imaging for a fixed exposure time while there is relative motion, such that each accepted line-scan data set has a corresponding distance of relative motion proportional to the relative speed,

wherein the resampling is as if each resampled line image data was obtained by imaging at a variable exposure time, such that each resampled line image data set has a fixed distance of relative motion during the variable exposure time, and

wherein for a particular resampled line image data set, during the fixed distance of relative motion during the variable exposure time, the resampled line image data set

Art Unit: 2621

includes a contribution from any accepted line-scan data set whose corresponding distance of relative motion overlaps with the fixed distance of relative motion, said contribution weighted by the fraction of the corresponding distance of relative motion in the overlap.

These features taken with the other features in the claims teach over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ERICK REKSTAD whose telephone number is (571)272-7338. The examiner can normally be reached on 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on 571-272-7418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
